EDUCATION

University of British Columbia

B.Sc. Computer Science (GPA: 3.73, Dean's List)

Vancouver, BC

Sep 2025 – May 2029

IMES + OIS Scholarships: \$100,000 CAD merit award to the top 100 international students.

Relevant Coursework: Software Construction, Computation & Program Design, Discrete Mathematics, Data Structures & Algorithms.

EXPERIENCE

Software Engineer Intern - Forward Deployed

Covena AI

May 2026 – Present

Jakarta, Indonesia

- Reached **95%** containment and **40%** average conversion across **10+** client agent builds, partnering with client teams from scoping to fully autonomous launch.
- Converted **20%** of inbound chats into booked pickups for a national e-waste client, cutting response time from **2 weeks to under a minute** with an autonomous scheduling agent.
- Scaled a **distributed multi-agent** pipeline to **2,000+** conversations/day in **TypeScript**, with layered guardrails and escalation routes debugged through **LangSmith** traces and evals.
- Integrated accounting, payments, inventory, and shipping systems into agents via HMAC-signed **REST APIs**, backed by **MongoDB** with files in **AWS S3**.

Software Engineer

Nuansa Musik

Jan 2026 – Apr 2026

Remote

- Architected a production web platform with cross-app **SSO** and **RBAC**, giving a retail chain live sales visibility.
- Cut manual reporting by **50 hrs/week** with a webhook-driven **NLP** pipeline in **TypeScript** and **Python** that turns free-text sales messages into structured records at a **90%** straight-through rate.
- Matched free-text product names to a **7,000+** item catalog at **95%+** accuracy via a **RAG** pipeline combining cosine-similarity embedding search with **LLM** re-ranking.
- Secured the platform with **row-level security**, authenticated webhooks, and read-only **SQL** for LLM queries.

PROJECTS

Synapse ↗ – ProduHacks '26 | *TypeScript, React, Claude API*

Mar 2026

- Engineered a live **multi-agent** brainstorming canvas supporting **50** concurrent AI agents that critique and synthesize ideas in real time.

Naiya ↗ – BizTech KickStart '25 | *TypeScript, PostgreSQL, DeepSeek-V3*

Nov 2025

- Cut inference time **90%** and latency **60%** in an open-source AI scheduling copilot with a hybrid LLM-plus-deterministic architecture.

LEADERSHIP

Partnerships Director

UBC BizTech

Apr 2026 – Present

Vancouver, BC

- Selected from **200+** applicants to own end-to-end partnerships for UBC's largest tech club (**1,000+** members).
- Ran outreach and coordination across **100+** sponsors, event partners, and media contacts, closing sponsorships and cross-team logistics for the club's flagship events.

SKILLS

Languages: Java, JavaScript, Python, TypeScript, SQL, HTML/CSS

Technologies: web application development (React, React Native, Next.js), back-end (Node.js, Flask, Deno), PostgreSQL, MongoDB (NoSQL), Supabase, pgvector, Redis, Firebase

Cloud Infrastructure: Cloudflare Workers, GCP, AWS (S3), Unix/Linux, distributed systems, serverless/edge functions, CI/CD (GitHub Actions)

AI & Data Science: machine learning, natural language processing, LLM integration (Claude, OpenAI, Gemini), multi-agent systems, RAG, embeddings, semantic search, agent evals & guardrails, LangChain, LangSmith, MCP
